A KNOWLEDGE ALLIANCE OF

NISPR
National Institute of Science Communication and Policy Research
सीएसआईआर-निसपर

Topic: Crafting a Profile for Selection of Career Path **Date:** June 08, 2023

Category: Career & Professional Development

Organized for: Students from class 5-12

Speakers/Presenters: Mr. Aiyaz Uddin (TedX Speaker and Founder of Careerologist)

No. of Participants: 700+ students from different schools across India

Overview:

On June 08th, 2023, KAMP conducted its 28th exclusive knowledge-sharing session on the topic "Crafting a Profile for Selection of Career Path" with 700+ students from different schools across India. The main aim of this workshop was to help students understand what a career is, why it is important to explore career options at an early age and how you can actually start exploring your career options now.

The session was convened by Mr. Aniket Arora, and facilitated by Mr. Aiyaz Uddin, who has a background in Career Guidance and Counseling. Career counseling empowers students to make informed decisions, explore their potential, and effectively navigate the complexities of the job market. It enhances their personal and professional development, increasing their chances of achieving long-term career success and satisfaction.

CRAFTING A PROFILE FOR THE SELECTION OF A CAREER PATH

In the session, Mr. Aiyaz pointed out that according to the Indian Association of Career Planning, very few people do career planning, many of them are influenced by the decisions by their parents, relatives or peers. Many of us don't even understand why we study, what is the use of their degrees, or is the degree even relevant to the career path we desire.

Thus, in today's world it becomes important to understand what is career

planning, the jobs or industries around oneself, how to make an efficient decision while choosing a career profile. It is very important for students to be aware of the companies around them, in their city, state, how they operate, what kind of roles and responsibilities they have. At a young age, students do need guidance to make such decisions. This workshop was conducted with the purpose to provide such expert guidance. Making sure that the students do not opt only for the career opportunities that they are surrounded by, rather do a hefty research and find their own way.

Conducting thorough research and taking the time to understand one's interests, strengths, and aspirations can lead to discovering unconventional career opportunities that align with their individual goals. By exploring different fields, industries, and possibilities, students can gain a broader perspective and uncover new avenues that may not be immediately apparent. They can delve into areas that may be emerging or have yet to be fully explored, allowing them to be at the forefront of innovative career paths. This mindset of independent exploration and research can lead to greater personal fulfillment and the ability to make a meaningful impact in their chosen field.

Moreover, this approach also encourages critical thinking, adaptability, and self-motivation, which are valuable skills in today's rapidly changing world. It enables students to think outside the box, challenge conventional wisdom, and create their own opportunities rather than being limited by existing options.

Without a doubt, this kind of independent exploration requires dedication, perseverance, and a willingness to take risks. It may involve networking, internships, mentorships, or gaining additional skills and qualifications to support their chosen path. However, by investing the time and effort into researching and finding their own

way, students can pave the way for a fulfilling and successful career that truly resonates with their passions and goals.

The purpose of KAMP's fortnightly workshops is to help students develop creativity, meaningful learning, and critical reading and thinking skills that bring out their inherent abilities. The vision of KAMP is to identify and capture Scientific and Technological temperament in students to make India – a Global Leader in the field of Science, Technology and Humanities.

Such workshops, conducted by KAMP deal with various topics that fall under the category of Science, Technology and Innovations, Scientific and Life Skills, Career & Professional Development, Academic Development and training the trainers/trainers.

KAMP believes that with exposure to such topics from experts within such specific fields, students will become aware of real-life situations and challenges, develop a helping, problem-solving nature wherever possible, understand their core values and personal interests, evaluate their skills within the given area, and achieve their best in their most desirable way.
